1. Introduction

This document provides Cisco Services First contract users with instructions for opening a Technical Assistance Center (TAC) service request using a Services Full Coverage contract.

Users can access the Support Case Manager (SCM) tool here: <u>https://mycase.cloudapps.cisco.com/case</u>.

2. Creating or Opening a Case

1. Navigate to <u>https://mycase.cloudapps.cisco.com/case</u>The screen below will be displayed:

Support Case Manager Create and manage support cases		• • •
	Specify a User Enter Cisco Account ID or email address	
	Lookup User	

- 2. Log in with your Cisco User ID. You may alternatively use the **email address** to which you are Cisco User account is associated.
- 3. Click "Open Case." (You will need to click "Open Case" a second time)
- 4. It is optimal to open the case by using the "Find Product by Service Agreement" Option.

(Using this option is best because it is a Services Full Coverage or "SFC? or Service First/Sweeps contract, which supersedes any warranties). This also means it is not required for you to have a Serial Number on contract to get support, if the device is not past Last Day of Support (LDOS).

You can check the status of the SN on the <u>SN Coverage Checker</u>.

5. If you have more than one Contract Number (Service Agreement) you can type in the contract number in the field called" "Service Contract". You may alternatively use the "arrow down" (Drop-down) option on the right of this field to show all available contracts.

(See the following screenshots, step 5 on what this looks like in <u>Support Case Manager (SCM)</u>.

Support Case Manager Open a new support case for yourccolD		•

1 Check Entitlement	2 Describe Problem	
Request Type Diagnose and Fix		
Find Product by Serial Number		
Find Product by Service Contract Use This Option (Not Finite	d Product By Serial Number) to oper	n the case
Bypass Entitlement Select one	~]	
Save draft and exit		

If you have more than one service agreement, you can use the drop down prior to searching:

Diagnose and Fix Request RMA Ask a Question	
 Find Product by Serial Number 	
 Find Product by Service Agreement 	
\checkmark There are 15 service agreements associated with this profile.	
Product Name (PID)	Product Descripti
Service Contract	
	<u></u>
Smart Account	
Virtual Account	
Advanced Options ~	
Search	

6. You can enter exact Product ID in Product Name (PID) field shown below, **OR** general descriptive terms like 9300 in **Product Description**:

Request Type	100		
Diagnose and Fix Request RMA Ask a Question	Use Service Agreement (CONTRACT) - NOT Serial Nun	nber when you have a SWEEPS contract.	
Y Find Product by Serial Number	You will be able to enter SN data la	iter in this process.	
Find Product by Service Agreement			
Product Name (PID)	Product Description 9300	Product Family 🗿	She Name
Service Contract			
Service Agreement # goes here	•		
Smart Account			Subscription Number
Virtual Account			Find Subscription Number()
Resch Snarch Sharch Discrete Freducts filtered for: Product Description (83)	00), Service Contract (90348234) Clear Filters		

7. Enter the **Product ID** OR the **Product Name** Field and click **search**, you will see a list like the one below. Be sure to notice the "hardware product not found" options at bottom of screen---(select that line) and click "submit". (You will have the option later to enter the SN).

<u>Note</u>: In the product description field, you should be able to enter general descriptive terms in the Product Description field (it does not have to be the exact name of the product).

	Podul SA		54	ter de la companya de		de Agreenant

a Entitement				~				

You can use a general description in the "product description" field. Examples:

- o IP Phone
- o UCS
- Route Switch
- Adaptative Services Router or "ASR"
- \circ ~ ISR or "Integrated Services Router"
- Stack cables

NOTE: Regarding the example "generic" description language for the **Product Description** Field: Please note that the SNs of the devices and their product IDs you may use here is related to what shows in the entitlement list of gear (bottom of screen). For Example: Some customers can use "UCS" as a generic search, but for those who do not have any UCS devices on contract, this would not work, and would affect your ability to open the SR under this "Hardware Not Found" option. In this case, it is recommended you use -the exact product ID in the **Product ID** Field instead.

After you enter the general **Product Description** field, and click SEARCH, you should then see the **Hardware Not Found** option.

Choose (Hardware not Found) as shown above--then proceed with the next screen. As your service agreement is a Services First Contract, even products not listed on contract are still supported (if they are not past Last Day of Support).

The next screen allows you to now enter the Serial Number. (This helps TAC group your request by Tech and problem code **Please note,** if you have no SN, you will need **a product ID** for this reason). If you have the Serial Number, you will enter it here:

	Prial Number or
110000000	
	VLIN
	1
roduct Serial Num	ber or VLIN
1234567	

If you have chosen the Product ID option, (if the product is Software or Virtual Appliance) you would enter the term "NonApplicable" in the SN field. (Spell out the words with no spaces).

8. After you click OK (after entering Serial Number) the screen will refresh and you will be prompted to enter the details of the service request (This will include a title). Complete the desired fields.

Be sure to include any related information such as errors, details on what is needed, along with any/all user (emails) to be contacted by TAC engineers who will be working on this case.

OPEN NEW CASE Products & Services			Need help with your case?
