

GLOBAL ENTERPRISE MODERNIZATION SOFTWARE & SUPPORT (GEMSS)

DOD ESI ORDERABLE ADVANCED SERVICES

ORDERABLE ESI ADVANCED SERVICES SUPPORT

Cisco’s Advanced Services, available to be ordered off of the ESI contract, are predefined fee-based engagements to compliment GEMSS dedicated engineering support. These services are focused on helping the DOD from defining strategy of future environments to optimization of established IT environments to meet mission needs. These engagements assist with mission capability, design, engineering, and project / program management.

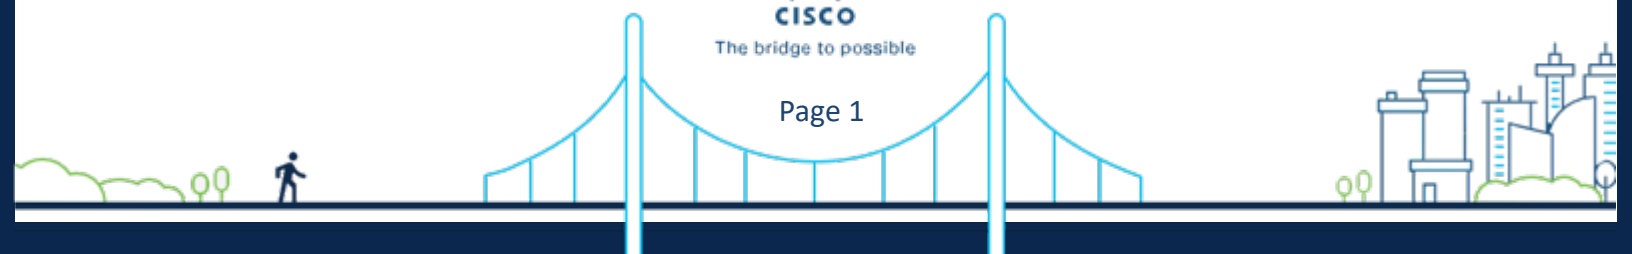

These pre-established services were developed using our deep history with the Department of Defense and leverages our broad commercial expertise. These services meet the unique needs and technology requirements of Defense customers. For ease of reference, we’ve organized the services offerings by our technology sectors in this document – Security, Networking, Data Center and Collaboration.

US DEPT OF DEFENSE

Table of Contents

1. ESI Security Advanced Services	2
2. ESI Networking Advanced Services	6
3. ESI Data Center Advanced Services	12
4. ESI Collaboration Advance Services	14

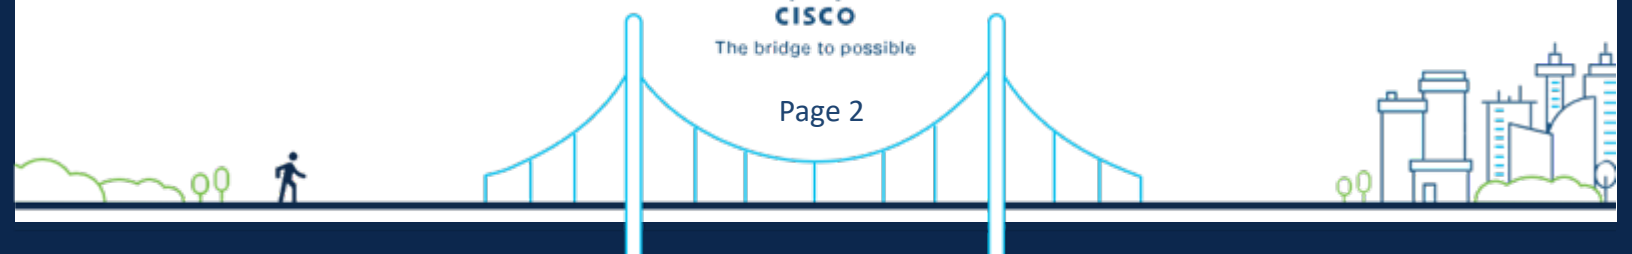

SECURITY

Security advanced service offerings helps you protect your IT environment and improve mission resilience. Organizations consuming these services get access to consultants and technical experts to support their staff with the latest knowledge and capabilities. They also help improve time to threat detection and response. And, by reducing complexity, you'll improve your ability to adapt to changing business priorities.

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
ISE Optimization	ISE XS	AS-NS-SMX-ISE-XS	Support for a single deployment with up to two (2) Nodes and up to 1,200 endpoints.
ISE Optimization	ISE S	AS-NS-SMX-ISE-S	Support for a single deployment with up to two (2) Nodes and up to 5,000 endpoints.
ISE Optimization	ISE M	AS-NS-SMX-ISE-M	Support for a single deployment with up to 7 Nodes and up to 30,000 endpoints.
ISE Optimization	ISE L	AS-NS-SMX-ISE-L	Support for a single deployment with up to 16 Nodes and up to 80,000 endpoints.
ISE Optimization	ISE Posture Support	AS-NS-SMX-ISE-P	Support for a limited posture deployment (up to 20 endpoints and 8 posture requirements), and Implementation plan.
ISE Optimization	ISE Upgrade Support	AS-NS-SMX-ISE-UP	Upgrade support for Identity Services Engine (ISE) on a single cluster with no more than 10 ISE nodes.
ISE Optimization	ISE Advanced Feature Module	AS-NS-SMX-ISE-AFM	Advanced Features for ISE; procured with an ISE Optimization of any size. This service is limited to any 2 combinations of posture, and pxGrid.
CCRI Prep Optimization	CCRI Small Network	AS-RS-SMX-CCRIS	Small networks of <= 100 devices - CAaaS uses automation tool and Cisco SME to audit customer network for STIG Compliance and remediation.
CCRI Prep Optimization	CCRI Medium Network	AS-RS-SMX-CCRIM	Medium networks of <= 10-250 devices - CAaaS uses automation tool and Cisco SME to audit customer network for STIG Compliance and remediation.
CCRI Prep Optimization	CCRI Large Network	AS-RS-SMX-CCRIL	Large networks of <= 251-500 devices - CAaaS uses automation tool and Cisco SME to audit customer network for STIG Compliance

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
ISE PDI	Plan	CX-PDIB-SE-PRE-ISE-P	Scope and services include ISE Strategy and Analysis report for base features (AAA (802.1X), guest, and profiling) and Advanced Features (BYOD, Posturing, pxGrid, and MDM)
ISE PDI	Plan + Design	CX-PDIB-SE-PRE-ISE-PD	Scope includes Base features and advanced features. Services include readiness assessment, design, and 12 hrs implementation support.
ISE PDI	Plan + Design + Lab	CX-PDIB-SE-PRE-ISE-PDL	Scope includes up to 1 appliance, 5 use-cases, 5 onboarded units, base features, and advanced features. Services include readiness assessment, design, testing, and 12 hrs implementation support.
ISE PDI	PDI Small	CX-PDIB-SE-PRE-ISE-PDIS	Scope includes up to 4 appliance, 12 use-cases, 50 onboarded units, and base features. Services include design, testing, limited pilot deployment, and 32 hrs implementation support.
ISE PDI	PDI Medium	CX-PDIB-SE-PRE-ISE-PDIM	Scope includes up to 8 appliance, 16 use-cases, 100 onboarded units, base features, and advanced features. Services include readiness assessment, design, testing, limited pilot deployment, and 40 hrs implementation support.
ISE PDI	PDI Large	CX-PDIB-SE-PRE-ISE-PDIL	Scope includes up to 8 appliance, 20 use-cases, 200 onboarded units, base features, and advanced features. Services include readiness assessment, design, testing, limited pilot deployment, and 40 hrs implementation support.

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
Stealthwatch PDI	Standard Implementation	CX-PDIB-SE-PRE-SWA-SIMP	Scope includes up to 10 SWATCH components. Services include site readiness assessment, implementation, knowledge transfer, and project management.
Stealthwatch PDI	Large Implementation	CX-PDIB-SE-PRE-SWA-LIMP	Scope includes up to 20 SWATCH components. Services include site readiness assessment, implementation, knowledge transfer, and project management.
Stealthwatch PDI	Implementation and Integration	CX-PDIB-SE-PRE-SWA-II	Scope includes up to 10 SWATCH components and 1 integration/automation. Services include site readiness assessment, implementation, knowledge transfer, and project management.
Stealthwatch PDI	PDI + Integration	CX-PDIB-SE-PRE-SWA-PDII	Scope includes up to 10 SWATCH components and 2 integrations/automations. Services include design, testing, implementation, knowledge transfer, and project management.
Stealthwatch PDI	Integration Only	CX-PDIB-SE-PRE-SWA-INT	Scope includes up to 1 integration/automation. Services include site readiness assessment, implementation execution, knowledge transfer, and project management.
Zero Trust PDI	Solution Plan	CX-PDIB-SE-PRE-ZTA-SOLN	Scope includes 2 site visits of 4 days each. Services include strategy and analysis development in support of zero trust strategy and current technical capability.

NETWORKING

Start realizing the benefits of a network that predicts, adapts, and protects your business. Our end-to-end guidance helps you migrate, adopt, deploy, and manage your intent-based network with ease and confidence. Improve network performance and quickly resolve issues with anytime access to our networking experts, online tools, and award-winning support.

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
NRA Optimization	Small	AS-RS-SMX-NRA-S	The Network Resiliency Analysis (NRA) is a Cisco Services deliverable that helps improve network resiliency by analyzing the current state engineering of underlying infrastructure components and assess against Cisco and industry High Availability leading practices for up to 250 Cisco Network devices (switches and routers).
NRA Optimization	Medium	AS-RS-SMX-NRA-M	The NRA is a Cisco Services deliverable that helps improve network resiliency by analyzing the current state engineering of underlying infrastructure components and assess against Cisco and industry High Availability leading practices for up to 500 Cisco Network devices (switches and routers).
NRA Optimization	Large	AS-RS-SMX-NRA-L	The NRA is a Cisco Services deliverable that helps improve network resiliency by analyzing the current state engineering of underlying infrastructure components and assess against Cisco and industry High Availability leading practices for up to 1,000 Cisco Network devices (switches and routers).

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
SD-WAN Migration PDI	Medium	CX-PDIB-NW-PRE-SWM-M	Scope includes up to 2 Hubs, 200 Branch devices. Service includes Migration assessment, plan and execution for scoped sites and devices.
SD-WAN Migration PDI	Large	CX-PDIB-NW-PRE-SWM-L	Scope includes up to 2 Hubs, 500 Branch devices. Service includes Migration assessment, plan and execution for scoped sites and devices.
SVS for SD-WAN PDI	Standard Validation	CX-PDIB-NW-PRE-SVW-STAN	Cisco® SD-WAN Solution Validation Advanced Services Solution provides testing support that helps you validate your solution. Our service includes a test assessment, test plan development, test execution, and testing support to accelerate the adoption of your SD-WA. We deliver a validated design that factors in configuration, features, resiliency, availability, capacity, and negative testing, and we also provide detailed, actionable analysis reports.

DATA CENTER

The evolution of new market dynamics is making the technology environment more complex. IT needs to simultaneously minimize complexity and cost while supporting the onslaught of new infrastructure and applications. We offer the right mix of automation, real-time analytics, and policy-based security - supported by strategic guidance and expert recommendations, to help you accelerate your data center transformation.

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
Tetration PDI	On-Prem Small (Enforcement)	CX-PDIB-SE-PRE-TET-OPS	Scope includes 250 workload licenses, 1 application under enforcement and up to 50 workloads license, and 3 integrations. Services include requirements workshop, implementation execution, as built, and knowledge transfer.
Tetration PDI	On-Prem Medium (Enforcement + Viz)	CX-PDIB-SE-PRE-TET-OPM	Scope includes 500 workload licenses, 1 application under enforcement and up to 50 workloads enforced, 1 visible application, up to 50 visible workloads, and 3 integrations. Services include requirements workshop, implementation planning and execution, as built, and knowledge transfer.
Tetration PDI	On-Prem Large (Enforcement + Viz)	CX-PDIB-SE-PRE-TET-OPL	Scope includes 1000 workload licenses, 2 applications under enforcement and up to 50 workloads enforced per app, 1 visible application, up to 50 visible workloads, and 5 integrations. Services include requirements workshop, implementation planning and execution, as built, and knowledge transfer.

COLLABORATION

Cisco collaboration solutions span a wide variety of technologies, including Collaboration Endpoints, Conferencing, Customer Collaboration, and Unified Communications—all with mobility in mind. You can meet your organizational goals with the help of the professional services and support we have developed around these and many other related technologies.

MAJOR HEADER	MINOR HEADER	ESI SKU	DESCRIPTION
Collaboration Optimization	UC Solution Upgrade	AS-UC-SMX-USU	Cisco Support AS will work with the customer to perform an upgrade on a single UC deployment consisting of the basic Cisco collaboration portfolio
Collaboration Optimization	Architecture Optimization & Stabilize	AS-UC-SMX-AOS	Determine root cause for any current solution stabilization issues being experienced. Can review configuration and provide knowledge transfer.
Collaboration Optimization	UC STIG Compliance	AS-UC-SMX-STIG	Identify which components of the UC solution are not STIG compliant and remediate findings for up to 2,500 phones, 5 Analog Gateways, 1 pair CUBE routers, 5 SRST sites with ongoing KT.
